GIVE WITH PROOF, NOT FAITH

KAIROS

Transparent giving for Nigeria

A clear need. A named provider.
A receipt for every giver.

Sokenu Abigail · Omohuma Miracle

THE GIVING LOOP

01

Publish the need

A story with a budget.

02

Pay the provider

Spending tied to the bill.

03

Show each donor

Their share. Their receipt.

THE PAYMENT CHALLENGE

A transfer succeeds. The bill may still be unpaid.

The missing link is between money collected and the bill it was meant to pay.

01

A real need

A school fee or hospital bill is shared with supporters.

02

A transfer succeeds

The money reaches the fundraiser's account.

03

The bill is still unclear

Funds can be diverted before the intended provider is paid.

A successful transfer is not proof that the need was met.

THE SOLUTION

Our solution.

Connect the contribution, the provider payment and each donor's own proof.

01

Check the cause

Identity, AI-assisted intake and an itemised budget naming suppliers.

02

Share one clear link

Story, budget and public ledger. Donations are intended to stay in escrow.

03

Pay verified vendors

Release funds to named providers, with a receipt for every donor.

The prototype demonstrates the flow. Live custody and settlement remain to be integrated.

THE DONOR EXPERIENCE

Every giver sees their own part.

Illustrative example, with upkeep covered separately.

70%

of the cause's funds paid to the hospital

A ₦7,000 contribution has ₦4,900 attributed to this payment.

YOUR DONATION WAS USED

₦4,900

of your ₦7,000

PAID TO **LUTH · Surgery**

YOUR SHARE 70% of your contribution

Example invoice #0042

The payment is shared proportionally across the donors who funded it.

DEMO & PROGRESS

What we can show you today.

We can show the accounting, payment controls and personal receipts today.

WORKING

Application logic

Accounting, budget checks, donor shares, notifications and public history.

SIMULATED

Money and identity

Bank transfer, Remita settlement and NIN lookup.

NEXT

Live integrations

Independent provider and evidence checks, licensed custody and settlement.

The demo uses seeded data. No real donations have moved.

Kirikiri Outreach - a hot meal for 200 inmates

Last month I visited Kirikiri and couldn't sleep after. On July 19th we go back with hot food, toiletries and toothpaste for 200 inmates. Itemized below - vendors get paid, not me.

₦155,000 of ₦500,000 — 31% · 3 donors

Help Chidinma walk again - surgery at LUTH

My sister Chidinma, 24, shattered her leg in an okada accident on Ikorodu Road. LUTH can fix it - we can't fix the bill alone. Every naira goes to the hospital directly, never to me.

How Kairos works

Donations sit in escrow. Organizers can't withdraw cash.

Payments go to verified vendors directly, never personal accounts.

Every payment comes back to yo receipt for your share.

Turn on payment alerts

THE TEAM

Abigail and Miracle.

A shared focus on making giving easier to account for.
